Education

Queen's University

BACHELORS IN COMPUTER SCIENCE

Ontario, Canada

Sep. 2019 - Apr. 2023

- Awards: Ratehub Award in Computing, Queen's University Excellence
- Courses: Data Structures, Computer Architecture, System-Level Programming, Logic for Computing Science, Discrete Mathematics

Work Experience

Shop Bonsai

FULL-STACK ENGINEER INTERN

Toronto

May. 2021 - Present

- Added features to React.js internal dashboard including product filters, and a user management system for administrators.
- Created external order fulfillment system for Customer Experience Team using TypeScript, Node.js, Apollo, and GraphQL.

Shop Bonsai

SITE RELIABILITY ENGINEER INTERN

Toronto

Jan. 2021 - Apr. 2021

- Implemented infrastructure as code using Terraform, automating Google Cloud deployments and MongoDB cluster creation.
- Improved monorepo by transitioning to Yarn V2 with local caching speeding up deployment and CI/CD workflows by 18 minutes.
- Revamped Node.js image API written in TypeScript by decoupling upload/download and splitting into micro-services.
- Optimized Docker build size by over 90% by implementing multistage builds and parent images.

Extracurricular Activity

Queen's Tech & Media Association

SOFTWARE DEVELOPER

Kingston

Apr. 2020 - Present

- Developed Pronto - a rental marketplace web app for students - with React.js, JavaScript, and Node.js.
- Created a CRUD system for managing user's posts, user log-in and authentication with FireBase, refund capability, a custom live messaging component, and a Stripe API to handle secure transactions between users of the application.

Queen's University Algorithmic Network & Trading Team

ALGORITHM DEVELOPER

Kingston

Sep. 2020 - Apr. 2021

- Created Python forex trading algorithm which was evaluated and trained on the Quant Connect Platform.
- Used statistical models such as ARIMA to make predictions based on correlation between forex markets and commodities.
- The trading algorithm was able to make a profit of \$90,000, or 1000% from an initial investment of \$10,000.

QMIND

AI DESIGN TEAM MEMBER

Kingston

Sep. 2019 - Apr. 2021

- Created a Python package with TensorFlow for recommender systems that uses a combination of deep, mixed, and matrix-based systems.
- Presented the package at CUCAI - Canada's largest undergraduate AI conference. Demo app created with Flask.

Pickering High School

TEACHER'S ASSISTANT

Ajax

Sep. 2018 - May. 2019

- Taught Java, and concepts such as Data Structures and Object-Oriented Programming to over 25 students during my Grade 12 year.

Projects

Course Central - 2021

[View Project](#)

- Progressive Web App for students to see a course's historical GPA and enrollment data, and read and write reviews. Built with Next.js, MongoDB, Firebase, Deno, Python, and Selenium.

Infinity & Beyond - 2019

[View Project](#)

- Android Arcade game made with Unity and C#. Currently sits at a 4.9/5 rating on the Google Play Store.

Skills

Languages	JavaScript, TypeScript, HTML, CSS, Python, Java, Kotlin, Bash, C, C#, MATLAB
Technologies	Node.js, Deno, Apollo, REST APIs, GraphQL, MongoDB, Firebase, SQL, Selenium
Frameworks	Express.js, React.js, Svelte, jQuery, Flask, TensorFlow, Gin
DevOps	Docker, Kubernetes, Terraform, GitHub Actions, Semaphore CI, Google Cloud Platform, CI/CD
